**CONFUSING PROBLEM?**

SOLUTION

- Single tube with metal bayonet coupling
- Single tube with male locking luer
- Single tube with male quick coupling connector
- Extendable tubing with male luer connector from aneroid or mercurial manometer
- Double tube with male quick coupling connectors
- Double tube with female luer slip connectors
- Double tube with threaded female connectors

---

**THE POPPA SYSTEM, A TRUE UNIVERSAL CONNECTION SYSTEM FOR NIBP CUFFS**

- **Safety** - POPPA doesn't connect to ANY OTHER DEVICE just NIBP
- **Safety** - Finally correct cuff sizing - with POPPA any cuff will fit any monitor. Your institution no longer has to run the risk of incorrect NIBP measurements due to mismatched cuffs, connectors and monitors. If you the correct size cuff, it will fit your monitor.
- **Safety** - no more struggling with incompatible single and double tube cuffs and monitor hoses. The POPPA system uses a single tube cuff system as standard with no loss of accuracy or speed of measurement. “see clinical references overleaf
- **Cost Savings** - Inventory management. Single tube Zefon cuffs fit all your monitors
- **Cost Savings** - Say goodbye to ordering a multitude of different cuffs and connectors
- **Cost Savings** - Biomedical Professionals now have a connector they can trust

**Patient Care** - POPPA allows true NIBP mobility throughout the hospital

Whether it be **Safety, Cost Savings** or **improved Patient Care**, the POPPA solution offers it all

**JOINT COMMISSION SENTINEL EVENT ALERT**

**ISSUE 36**

**April 3, 2006**

---

"Misconnection errors occur with significant frequency and, in a number of instances, lead to deadly consequences."

To read more of what the Joint Commission has to say, see over....

Side pressure is applied to disconnect, and a loud popping noise occurs to signal the user that the parts have been disconnected. An O-ring provides a seal of up to 60 lbf/sq in.

**Gauge Guards**

Dense rubber helps protect aneroid gauges from damage due to dropping or heavy abuse situations. Designed to fit most aneroid gauges on the market today, the MABIS® Gauge Guard comes in three attractive colors.

<table>

</tr>
<tr>
<td>#HH-05-250-030</td>
<td>Charcoal</td>
</tr>
</tbody>
</table>

**Calibration Tool**

Minimize downtime and associated transportation costs with this handy tool that offers the perfect solution for zeroing needles on standard aneroid gauges. Provides dealer flexibility and improved customer service. Note: Although most gauges are calibrated when the needle is resting at zero (circle/oval), this does not guarantee calibration.
