ONLY ONE

Supraglottic Airway Prevents Overinflation

The New Reusable SELF-PRESSURIZING

air-Qsp

now available in 0.5 size for neonates

• Takes the Guesswork out of Mask Cuff Inflation
  - No Inflation Line Necessary
  - Eliminates the extra step of inflating the mask cuff
  - Eliminates mask cuff overinflation
  - Up to 60 uses

Mercury Medical
Your Need . . . Our Innovation®
Introducing the ONLY
Reusable
SELF-PRESSURIZING Mask Cuff

Masked Laryngeal Airways

- The New Reusable air-Q_sp eliminates the extra step and guesswork for mask cuff inflation and the potential for over-inflation.
  - The New design allows Positive Pressure Ventilation to self-pressurize the mask cuff. The increase in cuff seal pressure occurs at the exact time you need it . . . during the upstroke of ventilation.

- On Exhalation, the cuff decompresses to the level of the PEEP.
  - The intra-cuff pressure cycles between the Peak Airway Pressure usually between 15 - 30 cm H_2O and the level of PEEP < 10 cm H_2O.

- Results . . . a safer, efficient, low-pressure seal during the majority of the case. The cyclical lowering in intra-cuff pressure may assist in diminishing complications such as:
  - Mucosal and Nerve trauma that result from over-inflating traditional peripheral laryngeal mask cuffs.

- Allows intubation like the regular air-Q®, the Reusable air-Q_sp version can be used as an “everyday” airway that facilitates intubation.
Introducing the New
Reusable, SELF-PRESSURIZING

7 sizes available
(disposable & reusable)

With the New patented SELF-PRESSURIZING Reusable air-Q, there is no need to inflate the mask...it self-pressurizes to the proper inflation pressure automatically.

... The Reusable everyday airway designed to facilitate intubation.
With the New Reusable SELF-PRESSURIZING air-Qsp, there is no need to inflate the mask. It self-pressurizes to the proper inflation pressure automatically during Positive Pressure Ventilation.

... The New Reusable SELF-PRESSURIZING Everyday Airway designed to facilitate intubation.

The new design has evolved into a superior airway and the Reusable air-Qsp now offers a new 0.5 neonatal size.
