**Eye Protection**

**LASER OPTI-GARD®**

Multiple Layers of Protection

The more barriers the better.
With **LASER OPTI-GARD®** we provide the same proven barriers to protect your patient as we have done for more than twenty years with our original OPTI-GARD® Patient Eye Protector. Now we have added additional barriers to OPTI-GARD® to protect your patients during laser procedures. **LASER OPTI-GARD®** utilizes layers of aluminum, foam, plastic, and the protective qualities of water to insure protection for laser patients and clinicians. Everything is provided including the water to make **LASER OPTI-GARD®** not only the safest product but also the most convenient.

**LASER OPTI-GARD®** is certified to IEC 60825-1 and EN 60825-4 the highest standards for patient laser protection.

**EYE-GARD™**

EyeGard™ by KMI Surgical, is the safe, effective way to protect the eyes during surgery.

EyeGard™ is a see-through barrier to cover the closed eye during anesthesia. EyeGard™ replaces tape, eliminating difficult tape handling with a gloved hand.

EyeGard™ is a new simple, unique and patented product consisting of a non-sterile, non-latex hypoallergenic material combined with a breathable, waterproof adhesive seal. The device is oval in shape, flexible to fit the patient and has a tab (without adhesive) for easy application and removal. In addition, EyeGard™ can be oriented with the tab laterally or medially for better fit.

**Advantages:**
- Cost effective
- Reduces lash removals
- Minimizes disease transmission
