Masks - Oxygen Blow-by

Now there’s a better way to deliver supplemental oxygen.

We share your vision of providing innovative solutions for your patients’ respiratory care. Introducing the first-of-its-kind Supplemental Air Diffusion Unit (SADU) for blow-by oxygen therapy. Designed for NICU and Pediatric Clinicians, the easy to use SADU Blow-by Device is the smart alternative to traditional oxygen masks and nasal cannulas.

“No more improvised blow-by devices from Dixie cups and medical tape. The SADU kit is exactly what we needed, but haven’t been able to find until now. Its versatility will be a great asset from the nursery to the emergency room.”

— RICHARD M. WHITE, RRT
CLINICAL SUPERVISOR, COEUR D’ALENE, ID

We’ve listened closely to respiratory specialists and designed the SADU system to your exacting needs.

- Unique patent-pending design not currently found in the industry
- Kit includes pre-installed 7-foot, 6-channel crush-resistant oxygen tubing
- Convenient stabilizing clips for attaching to patient’s clothing or bedding
- Flat edge intended for additional stability in nursery cribs
- Clear design allows easy sighting of foreign particles or potential blockage
- Oxygen tube stays securely fastened to SADU body
- No need for improvised delivery methods such as unstable, propped-up tubing
- DEHP-free and latex-free
- Wide range of application uses, from infants and toddlers to adults
- Perfect for those patients (such as fussy infants and toddlers) who cannot tolerate an oxygen delivery method which attaches to the head or face
- More comfortable than oxygen masks and nasal cannulas
- Ideal for relieving patients who have developed painful sores from cannulas, or for use in periods when oxygen therapy is not otherwise possible, such as during bandage changes

Discover the benefits of the SADU oxygen blow-by system.

- 25/Bx

**OxyPlus Aerosol KIT**
- Item #EM-OPN-4025-8
- 25/Bx

---

**OxyMask Aerosol Series Logical Advantages:**
- Greater patient compliance because mask is more comfortable to wear
- Swivel adapter
- Allows for optimal aerosol delivery when patient is laying down or is vertical
- Tapered design allows interfacing with a wide variety of inner and outer elbow nebulizer cups
- Unique design provides directional flow to mouth and nose generating a higher percentage of respirable dose and greater aerosol efficiency
- Closed sides and open bottom design enhances:
  - Greater aerosol efficiency
  - Prevents aerosol from going into the eyes
  - Minimizes environmental contamination
  - Minimizes exposure to caregivers and other patients

---

**Aerosol flow WITHOUT obstruction:**
- Competitors mask express aerosol as shown upward into the eye area
- The OxyMask Aerosol Series express aerosol towards patient's nose and mouth

**Note:** Tested at 6 LPM

---

**Aerosol flow WITH obstruction:**
- Competitor's mask expresses aerosol as shown upward into the eye area
- The OxyMask Aerosol Series expresses aerosol downward

**OxyMask O₂ % Guidelines**

---

**OxyMask’s logical advantages:**
- The only O₂ therapy device to deliver FIO₂ of 24% - 90%
- Can be utilized to deliver High Flow O₂ Therapy up to 40 L/min
- Eliminates CO₂ rebreathing
- Allows open communication with your patient
- Designed for nose and mouth breathers
- Convenient swivel elbow to reposition tubing
- Nasal Gastro tube can be threaded through OxyMask
- Allows for suctioning & oral care through mask

**Cost saving advantages:**
- Reduces number of O₂ devices per patient
- Simplifies and reduces inventory
- Reduces PVC waste
- Reduces manpower due to simple FIO₂ / flow changes

**Proven to Deliver Effective Heliox Therapy**
Masks

MERCURY MEDICAL® CLEAR ANATOMICAL FACE MASKS

The anatomically-designed contoured cushion conforms to natural facial contours allowing a secure low pressure seal and reduces damage to the eyes. Special attention has been given to the face cone of the mask raising the contour over the bridge of the nose. This accommodates pronounced facial features and eliminates contact with the patient. Clear construction allows continuous visual patient contact and reduces patient anxiety.

Features:
• Completely disposable. Eliminates cross-contamination risks and associated reprocessing costs.
• Clear material construction for better patient visualization.
• Anatomically designed. Reduces patient discomfort and accommodates a wide range of facial features.
• Soft, pliable, air-filled cushion. Reduces wrinkles or creases and allows for a secure, low pressure seal.

Masks/CPR

Laerdal® Pocket Mask™

The Laerdal Pocket Mask is the most widely used CPR mask in the world.

Its one-way valve and hydrophobic filter give effective ventilations and outstanding user protection. Others may look like the Laerdal Pocket Mask, but there’s only one original!

Standard Versions

#07-820001 Laerdal Pocket Mask w/Gloves & Wipe in Yellow Hard Case
#07-820040 Laerdal Pocket Mask w/Gloves & Wipe in Blue Soft Pack
#07-820041 Laerdal Pocket Mask w/Gloves & Wipe in Black Soft Pack
#07-820000 Laerdal Pocket Mask w/Gloves & Wipe in Yellow Hard Case
#07-820060 Laerdal Pocket Mask w/Gloves & Wipe in Re-sealable Poly Bag
#07-820042 Laerdal Pocket Mask w/Gloves & Wipe in Olive Green Hard Case
#07-820043 Laerdal Pocket Mask w/Gloves & Wipe in Camo Soft Pack

Oxygen Versions

#07-830011 Laerdal Pocket Mask w/Oxygen Inlet & Head Strap w/Gloves & Wipe in Yellow Hard Case
#07-830040 Laerdal Pocket Mask w/Oxygen Inlet & Head Strap w/Gloves & Wipe in Blue Soft Pack
#07-830041 Laerdal Pocket Mask w/Oxygen Inlet & Head Strap w/Gloves & Wipe in Black Soft Pack
#07-830016 Laerdal Pocket Mask w/Oxygen Inlet & Head Strap in Re-sealable Poly Bag

Laerdal® Paediatric Pocket Mask™

The most widely used CPR mask in the world is now designed with infants and children in mind.

Utilizing the same low-resistance one-way valve as the traditional Laerdal Pocket Mask in combination with a transparent soft silicone mask, the Laerdal Paediatric Pocket Mask is an excellent companion for the professional rescuer and first responder who have contact with infants and children.

#07-820050 Laerdal Paediatric Pocket Mask w/Gloves and Wipe in Blue/Yellow Soft Pack
#07-820052 Laerdal Paediatric Pocket Mask w/Gloves in Red/Black Soft Pack

A Physical Barrier for Mouth-to-Mouth Resuscitation

#4310-70155

The CPR MICROSHIELD has been developed to provide a Physical Barrier between the cardiac/respiratory arrest victim and the rescuer. It protects the rescuer against potentially contaminated backdrafts and secretions while providing a clear, flexible barrier to prevent unsanitary mouth-to-mouth contact.

This new, safer barrier device minimizes the need for alteration in the basic technique of mouth-to-mouth resuscitation. Once positioned into the victim’s mouth, the resuscitation procedure remains virtually unchanged.

The CPR MICROSHIELD also facilitates safer C.P.R. training on most models and manikins.

A Physical Barrier for Mouth-to-Mouth Resuscitation

#4310-70155

The CPR MICROSHIELD has been developed to provide a Physical Barrier between the cardiac/respiratory arrest victim and the rescuer. It protects the rescuer against potentially contaminated backdrafts and secretions while providing a clear, flexible barrier to prevent unsanitary mouth-to-mouth contact.

This new, safer barrier device minimizes the need for alteration in the basic technique of mouth-to-mouth resuscitation. Once positioned into the victim’s mouth, the resuscitation procedure remains virtually unchanged.

The CPR MICROSHIELD also facilitates safer C.P.R. training on most models and manikins.
LAERDAL POCKET MASK™ with ONE-WAY Valve and New Filter
Retains all of the qualities of the original Pocket Mask

- Prevents mouth-to-mouth contact with victim’s face.
- Facilitates a patient airway. Combines moderate head tilt, jaw lift and opening of mouth.
- More effective ventilation through mouth and nose simultaneously. Also allows ventilation if either mouth or nose is blocked.
- Transparent dome. Allows rescuer to check victim’s mouth for lip color and secretions.
- Easy-to-clean. Long life. Made of durable plastics. No leaks in cuff, even after long-term storage. May be washed in soapy water or disinfecting solution suitable for plastics.
- Standard coupling size. The 15mm port of the mask permits connection to standard manual or mechanical breathing devices without the use of extra adapters.
- Leak-proof seal. Pre-inflated, soft vinyl cuff shapes easily to adult, child and infant facial contours.
- Now includes barrier filter.

Part Number Description
07-82-00-11 Laerdal Pocket Mask w/Gloves & Wipe with one-way valve and filter
07-83-00-11 Laerdal Pocket Mask w/Gloves & Wipe with one-way valve, filter and O2 inlet
07-82-04-00 One-way valve (pkg. of 10)
07-82-06-00 Filter (pkg. of 10)
07-82-07-00 Update Pack (1 valve, 1 filter)

Simple and Reliable
A simple and effective tool for saving lives. Quick and easy-to-use. Preferred by police, ambulances, fire departments, hospitals and industrial safety personnel.

Reusable for manikin training. Disposable after single patient use. Stores with mask in container.

Mask Sprays/Head Harnesses

Maskumm™ Anesthesia Mask Spray - Economically Scents Masks For Easier Pediatric Induction.

- Maskumm™ eliminates the need for costly manufactured presented masks.
- Facilitates mask acceptance by pediatric patients.
- Two popular scents, cherry and bubble gum.
- Parent and child become actively involved in the induction by selecting the cherry or bubble gum.
- Fast and easy to apply.
- Maskuum™ does not require refrigeration.
- Environmentally safe, does not use fluorocarbons.
- Many adults prefer Maskumm™ scented aerosol.
- Maskuum is cost effective with approximately 300 spray applications per bottle.

HEAD HARNESS

#56-250BG  Bubble gum scent
#56-250C  Cherry scent

HEAD HARNESS

MASK HARNESS

- Molded, not stamped
- Reinforced holes on adult & child sizes for durability
- Anti-static, latex free neoprene
- Reusable
- Center vents for comfort and fit at back of head
